A small change should not interrupt your train of thought. Edit this paragraph and watch Full update locally. The same warmed LuaTeX engine typesets only the edited text or equation.

Full compilation handles page breaks and structural changes, or runs when you download the PDF. Your source stays on your device.

Mathematics is compiled by TeX too: $E = mc^2$, and

$$\sum_{k=1}^{n} k = \frac{n(n+1)}{2}.$$

Try changing a word in the first paragraph, then try a longer sentence. You can download the real PDF or save the source at any time.
